

BGP — Border GATEWAY PROTOCOL

→ The internet is not built on a network of computers — but a network of networks.

A can send packets directly to C and D.

networks
of

→ BGP is for autonomous systems.

→ it allows AS to find reachability and how to reach.

→ हर एज का जो भी msg. उस node को पहुँचा है — उसे जानना होता है reachability का मतलब है कितना है।

→ periodic relay — routing tables updated.
